## Your introduction to a new and affordable technology

Intellifi by Invengo solutions make it easy and affordable to identify and localize people or products in and around specific locations. It's cloud connected and bridges the benefits of low-cost passive RAIN RFID (UHF) and long range Bluetooth sensor technology into a single Internet of Things platform. For customers, this will be translated directly into saving time and money in the whole life-cycle of solution: the development, the deployment, and the operational phase. Interested? Join our partner training (hosted by RFID Indonesia) and learn how you and your customers can benefit from this technology.

### About Invengo

Invengo – the global RFID technology provider – is a leading developer and manufacturer of high quality, intelligent RAIN RFID (UHF) and NFC (HF) inlays, tags and connectivity solutions utilized in the Internet of Things (IoT).
